

IN-ROW ORCHARD MOWER

RF

AUTOMATIC SWING ARM

The PERFECT RF swing arm mower is a great machine to easily mow in the tree line. Its asymmetric layout and large offset enable to also work in orchards with larger tree canopies.

When the rubber swing arm protection touches the tree trunk, the disk rotates and deflects the mowing disk gently around the trunk. As soon as the springloaded swinging arm has passed the tree it automatically returns to its original position.

Robust design for professional fruit growers, excellent capacity and easy-to-use. A must have for organic growers.

RF SERIES

In-row orchard mower

The heavy v-belt transmission with automatic tensioning ensures an excellent capacity, also in tall grass.

For young trees or when operating on inclines >5% the RF mower can be provided with a hydraulic feeler bar.

Because of its large offset in combination with the swing arm, the RF mower is very well equipped to mow the grass between and underneath solar panels and to cut grass under board fences, along wire or rock fences and around fence posts.

OPTIONS

- Hydraulic offset
- Mechanic-hydraulic feeler system
- Raiseable swing arm
- Rubber wheels

TECHNICAL SPECIFICATIONS	RF-220	RF-340
Cutting width (cm/inch)	220 / 7'3"	340 / 11'2"
Min. power required at 540 rpm of pto (kW/HP)	19 / 25	33 / 45
Number of blades	2 + 1	4 + 1
Diameter blade of swing arm (cm/inch)	60 / 23 1/2	60 / 23 1/2
Cutting height (cm/inch)	4-14 / 1 1/2-5 1/2	4-14 / 1 1/2-5 1/2
Length of rear roller (cm/inch)	53 / 1'9"	95 / 3'1"
Max. offset from centre of tractor (cm)	215*	297*
Weight (kg/lbs)	495 / 1089	715 / 1573
